Julie, any word on the Superfund Process graphic? I probably will have a review draft in the morning, but we'll need to insert the Superfund graphic, so he's keeping a placeholder. If we get comments back by noon your time, we can get the camera-ready to you before the end of the day tomorrow. Cheers, Vivian

Hi, Vivian –

I spoke with Jannine about photos today, and she suggests these two.
She also agreed with you about photo #3 from the EMF PPT, as a good view of the site.
I am awaiting pix from Jonathan for the FMC site.

cheers – Julie

Julie –

Here are two possibilities if needed.

The first photo is taken while drilling. Caption could be something like:
Over 130 wells have been drilled at the Simplot OU. The wells are sampled regularly and the data used to track changes in ground water quality.

Second attachment is one of the many projects to stop and prevent leaks in the plant area. Caption could be something like: Simplot has replace many of the tanks and sumps in the plant area to prevent further ground water contamination.

...and here's the second one...

if they don't come through, please let me know.

Hopefully it worked!

Thanks – Julie

Hi Julie, apparently your message exceeds the size of my mailbox. Is there another way for me to get it or can you reduce the size of the message or attachments or send more than one email?

Thanks,

Vivian Melde
